WORK EXPERIENCE

ApexPlanet Software Pvt. Ltd. Bihar, India
Web Developer June 2025 – August 2025

- Developed five hands-on web development projects using HTML, CSS, and JavaScript, implementing semantic page structures and responsive layouts.
- Built interactive user interfaces using JavaScript DOM manipulation and event handling to improve webpage functionality and user interaction.
- Implemented responsive web components and client-side features across multiple task-based assignments during the internship.
- Maintained source code in a public GitHub repository using Git version control.

PROJECTS

CampusLoop AI: Multi-Agent Campus Borrowing GitHub

Tech: React.js, Tailwind CSS, Python, FastAPI, LangGraph, LangChain, PostgreSQL, pgvector, Supabase

- Built a full-stack campus marketplace where students list, discover, request and lend items, with borrow-request approval/rejection and unread-notification tracking.
- Designed a supervisor-based multi-agent AI assistant with LangGraph and LangChain that routes queries to Discovery, Lending, Policy and General agents, with an evaluator step to check each response.
- Implemented a RAG pipeline (PDF loading, chunking, Sentence Transformers embeddings, pgvector similarity search) so policy answers are grounded in the campus policy document.
- Secured the app with JWT authentication and server-side authorization; added image upload through Supabase Storage.

Interxora.ai: AI Interview Practice & Performance Platform GitHub

Tech: React.js, FastAPI, Python, LLM APIs, RAG, embeddings, PostgreSQL, pgvector, JWT, Google OAuth

- Built a full-stack platform that generates personalized technical and behavioral interviews from a candidate's resume and target job description using embeddings, pgvector semantic retrieval and LLMs.
- Added timed interview sessions with speech input, LLM-based answer evaluation, a final performance report and a dashboard to review past interviews.
- Implemented authentication with JWT and refresh tokens, Google OAuth, and email-based password reset (Gmail SMTP) with an enumeration-safe forgot-password flow.

Money Fintrack: Full-Stack Finance Management App GitHub

Tech: React.js, Tailwind CSS, Python, Flask, MongoDB, Redis, Razorpay

- Built a responsive finance app with user registration and login, balance management, money transfer, transaction history and profile/account management.
- Developed REST APIs in Flask with MongoDB, and integrated the Razorpay payment gateway (tested with real payments).
- Used Redis for login and payment caching with rate limiting.

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript
Frontend: HTML/CSS, React.js, Vite, Tailwind CSS, Streamlit
Backend & Services: FastAPI, Flask, SQLAlchemy, REST APIs, JWT Authentication, Google OAuth
Agentic/GenAI: LangChain, LangGraph, Multi-Agent Systems, RAG, LLM Tool Calling, Sentence Transformers, Groq API
Databases: MySQL, PostgreSQL, pgvector, MongoDB, Redis, SQLite
Tools & Cloud: Git, GitHub, Pytest, Vercel, Supabase, Razorpay
Software Engineering: Data Structures and Algorithms, OOPs, DBMS, SDLC, Computer Networks, Operating System

EDUCATION

Madhav Institute of Technology and Science Gwalior, Madhya Pradesh
Bachelor of Technology in Computer Science and Engineering September 2024 – July 2028
